

Packaging Solutions for Cultured Products & Ice Cream

with All Stainless Steel Machines

**poly
pack**

727.578.5000
www.polypack.com

SOLUTION 1:

- 12 Pack
- 2 Layers of 6
- 1 Pad
- No Glue
- No Inversion
- Sleeve wrap

ADVANTAGES:

- Eliminate top and bottom pad. The center pad alone will prevent product lids from chiming throughout distribution.
- No glue. No need to purchase this consumable item, less maintenance with elimination of hot melt dispenser. Polypack equipment can positively control products during collation without messy glue to hold products in place.
- Less film. Approximately 20% less film is used for the outer sleeve wrap when the top & bottom pads are removed. Products are held together much more tightly when the film is allowed to conform to the contours of the products.

EQUIPMENT:

Polypack can supply the collator & stacker, the cardboard dispenser & the shrink wrap machine.

SOLUTION 2:

- 6 Pack or 12 Pack
- 1 Layer of 6 or 12
- No Pads
- No Glue
- Inversion
- Sleeve wrap

ADVANTAGES:

- Eliminate pads completely. Inverted and nested products shrink wrap extremely well.
- Save on shipping. No need to purchase, ship, store & re-ship large quantities of corrugated material. This economical pack allows more bundles on a pallet with excellent stacking strength.
- No leaking products. The shrink wrap that surrounds the lids will conform to the shape of the products, and prevent the products from opening or leaking during distribution.

EQUIPMENT:

Polypack can supply the inverter, the collator & the shrink wrap machine.

The Polypack inverter positively controls the products during the entire process through the use of timing screws, and individual product grippers that can be configured to inversion sequence.

SOLUTION 3:

- 12 Pack or 24 Pack
- 2 Layers of 6 or 12
- No Pads
- No Glue
- Inversion
- Sleeve wrap

ADVANTAGES:

- Eliminate pads completely. Inverted and nested products shrink wrap & pallet stack extremely well.
- Save on shipping. No need to purchase, ship, store & re-ship large quantities of corrugated material. This economical pack allows more bundles on a pallet with excellent stacking strength.
- Sell to Club Stores. With Polypack's optional print registered film system, this large pack becomes a shelf-ready retail pack perfect for club stores.

EQUIPMENT:

Polypack can supply the inverter, the collator & stacker, and the shrink wrap machine.

The Polypack inverter positively controls the products during the entire process through the use of timing screws, and individual product grippers that can be configured to inversion sequence.

SOLUTION 4:

- 4 Pack or 6 Pack
- 2 Layers of 2 or 3
- No Pads
- No Glue
- No Inversion
- Sleeve wrap

ADVANTAGES:

- Retail quality package. Add optional label orientation or print registration for maximum shelf appeal.
- No leaking products. The shrink wrap that surrounds the lids will conform to the shape of the products, and prevent the products from opening or leaking during distribution.

EQUIPMENT:

Polypack can supply the collator & stacker, and the shrink wrap machine.

Additional equipment information on the back of this brochure.

STANDARD EQUIPMENT FEATURES:

- All Stainless Steel Construction
- NEMA 4X Rated Motors & Electrical Enclosure
- Color Touchscreen Operator Interface
- Automatic Conveyor Lubrication
- Drip Pans Under Conveyors & Over Film Feeds
- Water Evacuation Channels
- Fast Product Changeovers - Tool-free Change Parts

OPTIONAL EQUIPMENT FEATURES:

- Print Registered Film (Single Roll Technology)
- Wraparound Case Packing
- Product Label Orientation
